PROFESSIONAL SUMMARY

Master's graduate in Mathematics with expertise in statistical analysis, quantitative research, and data-driven decision-making. Experienced in collecting, analyzing, and interpreting data using IBM SPSS, Microsoft Excel, Google Looker Studio, Python, and R. Skilled in developing interactive dashboards, conducting quantitative research, and producing scientific publications in applied statistics. Strong ability to transform complex data into meaningful insights and deliver clear analytical reports to support strategic decision-making.

EDUCATION

Master of Science in Mathematics, Universitas Sumatera Utara (2023 – 2025)

Bachelor of Mathematics, Universitas Islam Negeri Sumatera Utara (2017 – 2022)

RESEARCH & DATA ANALYTICS PORTFOLIO

Master's Thesis

- Developed a decision-making model using Min–Max Fuzzy TOPSIS integrated with Entropy Weight.
- Conducted sensitivity analysis and interpreted results to generate data-driven recommendations.
- Published in ZERO: Journal of Science, Mathematics and Applied Science (2025).

Penelitian Skripsi:

- Conducted spatial statistical analysis using Geographically Weighted Regression (GWR) on national-level data.
- Published in ZERO: Journal of Science, Mathematics and Applied Science, Vol. 6 No. 2 (2022).

Data Analytics Dashboards

- Developed a **Global E-Commerce Dashboard** using Google Looker Studio to analyze USD 8.02 million in sales, including sales trends, profitability, and discount performance.
- Built a **Multi-Channel Sales Dashboard** based on simulated business data totaling IDR 3.02 billion in revenue to monitor KPIs, sales performance, and refund rates.

Statistical Data Analysis

- Conducted quantitative data analysis using IBM SPSS by performing validity and reliability testing, descriptive statistical analysis, interpreting statistical results, and preparing research tables and analytical reports to support academic research.

PROFESSIONAL EXPERIENCE

Mathematics Tutor | F1 Course & Harvard English Centre | 2022–Present

- Delivered more than 850 mathematics tutoring sessions for elementary, junior high, and senior high school students.
- Designed instructional materials, assessments, and individualized learning plans.
- Strengthened communication, presentation, and quantitative problem-solving skills through student-centered instruction.

CERTIFICATIONS & ACADEMIC ACTIVITIES

- Data Visualization with Looker Studio – MySkill (2026)
- Presenter, *International Conference on Frontiers in Operations Research and Applied Mathematics (FORAM 2025)*
- TOEFL ITP Score 540 (2025)

TECHNICAL SKILLS

Software: IBM SPSS • Microsoft Excel (Advanced) • Google Looker Studio • Microsoft Office • Python • R

Keahlian: Statistical Analysis • Quantitative Research • Data Analytics • Data Visualization • Data Interpretation • MCDM • Fuzzy TOPSIS • Geographically Weighted Regression (GWR) • Scientific Writing
